

# Problem of the Week

December 11 – December 18, 2007

Mrs. Kinsella is baking cookies for her second grade class. She prepares a slab of cookie dough with the dimensions 15 cm by 25 cm by 2 cm. How many Christmas tree cookies can she make if the area of the cookie cutter below is  $4 \text{ cm}^2$  and each cookie must be 1 cm thick before it can be baked?

*Note: This week's solutions are due by Tuesday, December 18*
